iTour SmartGuide

- ▶ What is the itour SmartGuide?

Receiver app for the guests

Transmitter for the guide

iTour SmartGuide

▶ How does the transmitter work??

- ✓ Works with all usual smartphone models which have 2.4 Ghz or 5 Ghz WiFi
- ✓ Creates (and streams via) an **OFFLINE**-WiFi-network - no mobile internet access required!
- ✓ Reach of 60 to 80 meters in-, and outdoors
- ✓ Battery life: 8 hs.

iTour SmartGuide

- ▶ How does the app work?

iTour SmartGuide

▶ What advantages does the itour SmartGuide have?

1. OFFLINE-transmission: no mobile internet required, no data consumption or roaming

Your international guests will appreciate it!

2. optional: Transmitter = Hotspot / free WiFi on the tour
3. Connection stability and quality
/ is not subject to the fluctuations and restrictions of the mobile network
4. Very low latency – also in large groups
5. No guide phone needed:
 - no uncertainties of operation
 - no risk of a dead battery
 - or other problems

iTour SmartGuide

▶ In a nutshell:

Our transmitter brings all dependencies on sources of interference and errors that are difficult to influence to their absolute minimum:

- ✓ Ensures a **consistently stable and low-latency connection**, even with large groups - partly under 100 ms
- ✓ Our system transmits via an **offline network** and therefore **guaranteed without hidden costs**
- ✓ Our transmitter is very **easy to use**, robust, and durable
- ✓ Allows you to offer your guests **free internet during the tour**

At a glance:

	itour SmartGuide
Quantity of possible connections	100
Very low latency (< 130 ms)	✓
OFFLINE: No data consumption / roaming	✓
Very small app size	4 MB
SDK available / integration into other app possible	✓
Battery consumption per hour	8 %
Automatic reconnection	✓
Smartphone camera can be used simultaneously with receiver app	✓
